

Voice Mail with Harbour ISP

Voicemail has to be requested through iVox and Harbour ISP will let you know once it has been activated for you.

Harbour ISP will issue you with a username and password for your voicemail service when activated.

To get to the voicemail menu you dial 121 from your phone or (02) 8252 0215 from an external phone, then follow the prompts for example “press 1 for new messages” etc.

Alternatively you may like to receive your messages in an email.

For message waiting, you can enable Voicemail to email via a user interface by going to this URL <http://vm.ivox.com.au>.

A screenshot of a web-based login interface. At the top, there is a red horizontal bar with the text 'Login to Voicemail Manager' in white. Below this bar, the background is light gray. There are two input fields: the first is labeled 'Username' and the second is labeled 'Password'. Below the password field are two buttons: 'Login' and 'Clear'. At the bottom of the form area, there is a checkbox followed by the text 'Remember login permanently?'.

You can enter the email address you would like your voicemail message to go to in the voicemail portal. The voicemail will then be delivered to that email address as an attachment, usually as a WAV file and you can listen to it on your computer.
